DIAMOND

DIAMOND HELMET
2019

RIAS – Rotation Impact Absorbing System

Diamond è l'innovativo e rivoluzionario casco messo a punto dai tecnici UFO PLAST, realizzato dopo una lunga e attenta ricerca volta a raggiungere il massimo livello di protezione e comfort, utilizzando le più avanzate tecnologie ed i materiali più pregiati per proteggere e rendere più confortevole la guida dei piloti del fuoristrada.

DCS - Diamond Concept Shell

La calotta esterna Diamond e il suo originale design "a diamante", studiato per ottimizzare la struttura della calotta così da massimizzare l'assorbimento e la dissipazione degli urti, è stata costruita con le più moderne tecnologie ed è composta da un'alta percentuale di Carbonio (oltre il 60%) e fibra Aramidica per massimizzare le prestazioni e minimizzare il peso.

RIAS – Rotation Impact Absorbing System è la tecnologia rivoluzionaria del casco Diamond: La struttura del casco oltre che dissipare gli urti per assorbimento in compressione come i caschi tradizionali (impatto lineare), combina una tecnologia innovativa che consente di dissipare l'energia associata all'accelerazione rotazionale (impatto rotazionale), riducendo la tensione e fornendo una protezione supplementare in alcuni tipi di impatto. Questo è possibile grazie al lavoro combinato dei diversi strati di materiale utilizzati:

Calotta interna principale, realizzata in EPS ad alta densità, è caratterizzata da una superficie esterna (quella a contatto con la calotta esterna) molto compatta e rigida. La superficie interna presenta ampie scanalature che offrono una doppia funzione: garantiscono un maggior afflusso d'aria e permettono di differenziare la dissipazione degli urti, di fatto, come se lo strato principale avesse due diverse densità.

Calotta interna oscillante, costituita da polipropilene espanso a densità ridotta (PPE) per fornire un assorbimento progressivo, è stata progettata per ruotare all'interno del casco, lavorando in combinazione con la Calotta interna principale. Questo sistema permette uno scivolamento multidirezionale che consente di dissipare anche l'energia associata all'accelerazione rotazionale, così da migliorare la protezione in caso di impatto rotazionale.

Diamond is the innovative, revolutionary helmet developed by UFO PLAST engineers, created after long and careful search aimed at achieving the highest level of protection and comfort, using the most advanced technologies and materials to protect and make off-road driving more comfortable.

DCS - Diamond Concept Shell

The outer Diamond shell and its original "diamond" design, studied to optimise shell design to maximise shock absorption and dissipation, has been built using the latest technology and is made up of a high percentage of Carbon (over 60%) and Aramid fibre to maximise performance and minimise weight.

RIAS – Rotation Impact Absorbing System is the revolutionary Diamond helmet technology: In addition to dissipating compression-absorbing shocks like traditional helmets (linear impact), the helmet structure combines innovative technology that dissipates the energy associated with rotational acceleration (rotational impact), reducing tension and providing additional protection for some types of impact. This is all possible thanks to the combined work of the different layers of material used:

The main inner shell in high density EPS is characterised by a very compact, rigid outer surface (in contact with the outer shell). The inner surface has large grooves that offer a dual function: they provide greater airflow and differentiate impact force dissipation, effectively as if the main layer had two different densities.

Inner oscillating shell, consisting of low density polypropylene foam (PPE) to provide gradual absorption, was designed to rotate inside the helmet, working in conjunction with the Main inner shell. This system enables multi-directional sliding that also dissipates the energy associated with rotational acceleration, so as to improve protection in case of rotational impact.

LEAS – Limited Extension Anti Shock

Il Casco Diamond Inoltre è dotato di protezioni in materiale espanso, una di esse è posizionate nella parte bassa della mentoniera e l'altra è situata nella parte posteriore alla base del collo. Questo avanzato sistema di protezione rappresenta un importante progresso nel contenimento della flessione anteriore e posteriore del collo e nella dissipazione dell'urto in caso di caduta. Il sistema può lavorare in combinazione con i moderni tutori per il collo.

SVS – Sliding Visor System

UFO PLAST ha inoltre ideato un esclusivo sistema di regolazione della visiera, integrando nella parte centrale un flap a scorrimento che permette la regolazione della lunghezza della visiera anche in movimento.

Il Casco Diamond è inoltre dotato del complesso Sistema di ventilazione **AES - Airflow Extraction System**: nella parte frontale alta, sotto la visiera, si notano le tre ampie prese d'aria che in abbinamento ad altre 4 feritoie poste subito sotto la guarnizione viso, convogliano aria fresca direttamente nella calotta. L'interno in EPS è canalizzato per una perfetta distribuzione del flusso d'aria che viene convogliata ed estratta da ben quattro grandi estrattori posizionati nella parte posteriore della calotta: due nella parte superiore, e altri due situati nella parte inferiore. Questo sistema garantisce una perfetta estrazione dell'aria ed un'ottimale dissipazione del calore.

LEAS – Limited Extension Anti Shock

The Diamond Helmet is also equipped with foam protections. One of these is located at the bottom of the chin- rest, and the other at the back at the base of the neck. This advanced protection system represents an important advance in the containment of the front and back neck flexion and in impact dissipation in the event of a fall. This system can work in conjunction with modern neck braces.

SVS – Sliding Visor System

UFO PLAST has also designed an exclusive visor adjustment system, incorporating a sliding flap in the middle that adjusts the length of the visor even when moving.

The Diamond Helmet is also equipped with a complex **AES - Airflow Extraction System** ventilation system: at the top front, under the visor, there are three large air vents which, in conjunction with the other 4 slots underneath the facial foam, convey fresh air directly into the shell. The EPS interior is channelled for perfect airflow distribution that is conveyed and extracted by four large extractors positioned at the back of the shell: two at the top and two at the bottom. This system guarantees perfect air extraction and excellent heat dissipation.

The Diamond Helmet is fully removable for easier maintenance and cleaning: all components are fixed with Torx imprint aluminium screws (T8).

LEAS – Limited Extension Anti Shock

SVS – Sliding Visor System

AES - Airflow Extraction System

Il Casco Diamond è completamente smontabile per facilitarne la manutenzione e la pulizia: tutti i componenti sono fissati tramite viti in alluminio ad impronta Torks (T8).

L'interno, fissato al casco mediante bottoni automatici a pressione, è realizzato in materiali pregiati e traspiranti e offre un eccellente comfort. Le imbottiture interne sono di facile smontaggio e completamente estraibili, per consentirne il lavaggio e garantire una perfetta igiene.

ECPR - Emergency Cheek Pads Removing

I guanciali sono dotati inoltre del Sistema di sgancio rapido per i casi di emergenza. Questo permette di togliere i guanciali con il casco indossato consentendo una più agevole rimozione del casco in caso di incidente.

Sistema di ritenzione

Il casco Diamond è dotato di un sistema di chiusura del cinturino sottogola con chiusura doppia D in alluminio anodizzato, con nastro tubolare da 25 mm, completo di bottone di chiusura ad aggancio magnetico. Il nastro di chiusura offre inoltre una confortevole imbottitura regolabile in lunghezza.

The interior, mounted on the helmet by means of snaps, is made of premium, breathable materials and offers excellent comfort. The inner padding is easy to disassemble and fully removable for washing and to ensure perfect hygiene.

ECPR - Emergency Cheek Pads Removing

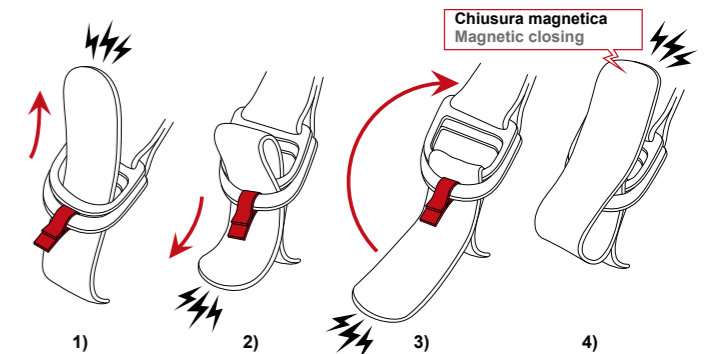

Cheek pads are also equipped with a Quick removal system in case of emergency. This allows users to remove cheek pads with the helmet still on, allowing for easier helmet removal in the event of an accident.

Latching system

Diamond helmets are equipped with a chin-strap closing system with double D closure in anodised aluminium with 25 mm tubular band complete with magnetic hooking closing button. The closing band also offers comfortable, adjustable length padding.

QUIVER

HELMETS

- Disponibile in 5 grafiche
- Realizzato in policarbonato ad altissima resistenza e progettato per soddisfare le richieste dei piloti più esigenti
- Calotta esterna in resina termoplastica ad altissima resistenza
- Sistema di ventilazione con estrattori d'aria posteriori per un'ottima distribuzione dell'aria
- Interni completamente rimovibili e lavabili
- Cinturino con chiusura doppia D
- Compatibile con tutori per collo
- Omologato ECE 22.05
- Frontino regolabile in altezza

- Available in 5 graphics
- Made of high-strength polycarbonate and designed to meet the requirements of the most demanding riders
- External Shell in High Resistance Thermoplastic Resin
- Ventilation system with rear air extractors for an excellent air distribution
- Fully removable and washable inners
- Double D strap
- Neck brace ready
- ECE 22.05 Homologated
- Height-adjustable visor

SIACHEN COOLING VEST

SIACHEN COOLING VEST | GC04427

SIZES: One size fits all | Color: K

Il corpetto SIACHEN con tecnologia INUTEQ-DRY® ad effetto rinfrescante per evaporazione è comodo, aderisce al corpo ed è leggero. Non prevede refrigerazione né prodotti chimici. Riduce lo stress termico e la fatica, garantendo una gradevole sensazione di fresco e una miglior prestazione. Grazie all'esclusiva tecnologia utilizzata, non si inumidisce né si bagna. Per questo il gilet può essere indossato sotto agli altri abiti. I prodotti INUTEQDRY® sono studiati per essere indossati in ambienti con temperature non estreme e offrono le prestazioni migliori in presenza di condizioni di bassa e media umidità. L'intensità del flusso d'aria sul corpo determina l'effetto e la durata dell'azione rinfrescante.

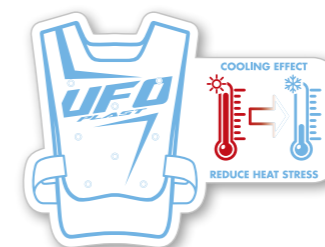

Caratteristiche del prodotto:

- Tecnologia di raffreddamento esclusiva
- 100% asciutto all'interno ed all'esterno
- Lavabile in lavatrice, proprietà antibatteriche
- Facile da utilizzare e riutilizzare
- Leggero, non tossico, a lunga durata
- Effetto rinfrescante fino a 15°C / 59°F in meno rispetto alla temperatura ambiente
- Offre fino a 3 giorni di effetto rinfrescante, in base a temperatura, flusso d'aria, livelli di umidità

The SIACHEN evaporative cooling vest products with INUTEQ-DRY® technology is comfortable, full-fashioned and light weighted. No refrigeration or chemicals are required. This product will reduce heat stress and fatigue, allowing you to feel comfortable cool and to perform better. Due to the unique technology system, this product will not become wet or soggy, making it suitable to wear the vest underneath clothing. The INUTEQ-DRY® cooling products are designed to be worn in an environment with an ambient temperature that is not extreme and perform best in low to medium humidity. The level of airflow on the body determines the cooling effect and cooling duration.

Product features:

- Incorporates a unique cooling technology
- Stays 100% dry inside and outside
- Is machine washable and has antibacterial properties
- Is easy to use and re-use
- Is lightweight, non-toxic and durable
- Provides up to 15C / 59C cooling relief below ambient temperature
- Offers up to 3 days of cooling comfort, depending on temperature / airflow / humidity levels

ISTRUZIONI • INSTRUCTIONS

- 1 Inserire 0,5 L di acqua fresca nell'apertura stagna sul retro
Insert 0.5 L of fresh water into the opening on the back
- 2 Dopo l'operazione richiudere l'apertura stagna e stendere il gilet aperto su una superficie piana
After the operation, close the opening and spread the open vest on a flat surface
- 3 Dopodiché passare le mani sopra il gilet per far defluire l'acqua all'interno in modo da farla incanalare in tutte le parti interne
Then pass your hands over the vest to drain the water inside so that it is channeled in all the internal parts
- 4 Prima di indossare il gilet aprire l'apertura stagna sul retro ed espellere l'acqua in eccesso facendola fuoriuscire dal gilet
Before wearing the gilet please expel the exceeded water from the opening on the back making it come out of the vest

Una volta esaurito l'effetto rinfrescante, ripetere l'operazione dal punto 1 al punto 4
Once the cooling effect is finished, repeat the operation from point 1 to point 4

KOMBAT PADDED SHORTS | PI02354

SIZES: XS - S - M - L - XL - XXL | Color: A - B

CAMO UNDERSHIRTS WITH LONG SLEEVES | MG04407

SIZES: S/M - L/XL - XXL | Color: K

100% MADE IN ITALY

La maglia intima CAMO con manica lunga è stata realizzata in collaborazione con SIXS®. Il materiale della maglia è composto da polipropilene poliammide e carbonio. Il polipropilene ha la eccezionale capacità di rimanere sempre asciutto essendo idrofobico. Grazie alla struttura ad imbuto della brevettata trama SIXS la maglia attira l'umidità della cute assorbendola e trasferendola all'esterno, lasciando il corpo asciutto e naturalmente termoregolato. Il vero filamento di carbonio che si intreccia al polipropilene amplifica la capacità di regolare la temperatura corporea, e dona proprietà antistatiche. In estate la trama sixs permette di trasferire il calore all'esterno tramite il sudore e l'umidità, lasciando asciutti e freschi. In inverno le stesse caratteristiche permettono di non raffreddarsi a causa del sudore sulla pelle ma di rimanere asciutti e caldi.

- Termoregolazione costante
- Massima traspirabilità
- Leggera come una piuma
- Batteriostatica
- Asciugatura rapida

CAMO undershirt with long sleeves is made by collaboration with SIXS®. The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete correct thermoregulation and optimum breathability under all conditions.

The low density zones are created by using carbon fiber that not only is extremely hard-wearing and ultralight, but also boasts an enormous thermal insulation capacity. Its fineness in the form of textile fiber, which makes it practically invisible to the human eye, creates those micro cavities that channel sweat to the outside so the skin is left dry. Dryarn®, polyamide fiber and polyurethane fiber, complete the blend and add essential characteristics such as: thermoregulation, water-repellency, bending and wear resistance, stretch and non-deformability.

Thanks to its blend of textile fibers, the Carbon Underwear® fabric is just like a breathable barrier that keeps the body temperature constant under all weather conditions. The patented SIXS weave stitch and the polypropylene found in our fabric create a perfect combination: a lower liquid absorption rate and a greater water vapour permeability than other textile fibers. The Carbon Underwear® fabric has the lowest specific weight of all textile fibers on the market. The Carbon Underwear® fabric respects the skin and protects it from bacteria and pollutant dusts. Eliminating the risk of annoying allergies and unpleasant smells. The Carbon Underwear® fabric dries almost instantly, due to its capacity to not absorb liquids and moisture.

- Constant thermoregulation
- Maximum breathability
- Light as a feather
- Bacteriostatic
- Fast drying

**CAMO UNDERSHIRTS WITH SHORT SLEEVES | MG04406**

ATRAX UNDERSHIRT WITH BACK PROTECTOR | PS02385

SIZES: S/M - L/XL - XXL | Color: K

POWERED BY

MADE IN ITALY

La maglietta ATRAX con protezione schiena è realizzata in collaborazione con SIXS® e include una protezione posteriore con protezione interna multistrato (3 strati) composta da due strati in materiale "Microshock" con all'interno uno strato di materiale KOROYD CORES. Protezione interna rimovibile per il lavaggio.

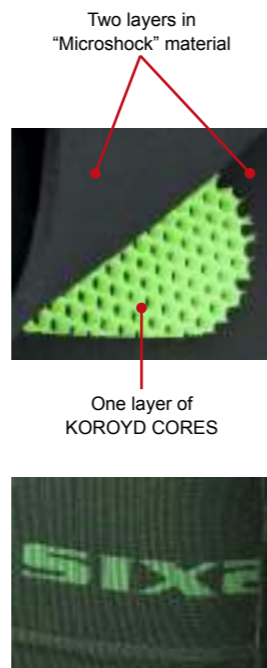

La composizione del tessuto Original Carbon Underwear® consente al sudore di essere veramente portato via dalla pelle verso l'esterno a causa delle zone a bassa densità che si alternano correttamente con le zone di leggera pressione. Questa peculiarità garantisce all'atleta una corretta termoregolazione e un'ottima traspirabilità in tutte le condizioni.

- Protezione posteriore della schiena multistrato (con uno strato di Koroyd Cores)
- Protezione rimovibile per il lavaggio
- Termoregolazione costante
- Massima traspirabilità
- Leggero come una piuma
- batteriostatico
- Asciugatura veloce

ATRAX undershirt with back protection is made by collaboration with SIXS® and includes back protection with internal multilayer (3 layers) protection made by two layers in "Microshock" material with one layer of KOROYD CORES material inside. Internal protection removable for washing.

The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete correct thermoregulation and optimum breathability under all conditions.

- Multilayer Internal back protection (with a layer of Koroyd Cores)
- Protection removable for washing
- Constant thermoregulation
- Maximum breathability
- Light as a feather
- Bacteriostatic

ONYX HELMETS FOR KIDS

Il nuovo casco Onyx da bambino offre le stesse caratteristiche estetiche e tecnologiche di un casco da adulto, ampliando così la gamma di caschi off road nella fascia entry-level anche per i bambini. Realizzato in policarbonato ad altissima resistenza, Onyx dispone di interni che offrono un'eccellente calzabilità e sono asportabili e lavabili a favore dell'igiene. Estrattori d'aria posteriori, il frontino regolabile in altezza e il cinturino con chiusura doppia D, lo rendono un prodotto decisamente raffinato. Il casco è disponibile in 2 nuovissime grafiche.

New Onyx helmet for kids offer the same features of the adult version, thus expanding the range of helmets off road in the entry-level also for kids. Onyx helmet is made of high-strength polycarbonate. The internal pads offer excellent fit, and they are removable and washable for optimal hygiene. Rear air extractors, the visor height-adjustable and the strap with double D, make it a very high quality product. The helmet is available in 2 new graphics.

(24/26) (28/30) (32/34) (36/38) (40/42)

Pantaloni "MIZAR" da bambino realizzati in poliestere con materiali aerati e spandex

- Protettivo e resistente alle abrasioni
- 100% poliestere
- Spandex per favorire i movimenti
- Massima traspirabilità grazie all'impiego di materiale aerato Airmesh
- Loghi in TPR

"MIZAR" Pants for kids made by polyester with ventilated material and spandex material

- Protective and resistant to abrasion
- Made by 100% polyester
- Spandex material enhancing the movements
- The large use of Airmesh material to favours air circulation inside the pants
- TPR logos

KOMBAT PADDED SHORTS FOR KIDS | PI02355

SIZES: S - M - L - XL | Color: A - B

100% MADE IN ITALY

Shorts "Kombat" da bambino con protezioni (laterali e posteriore) multistrato, formate da 2 strati in materiale "Microshock" traforati per una migliore traspirazione

- Grande ergonomia e massima libertà nei movimenti
- Tessuto tecnico Sensitive® e Airnet: leggero e traspirante
- Protezione laterale per prevenire le forti abrasioni
- Protezione posteriore removibile

"Kombat" padded shorts for kids with (lateral and back) multilayer protection made by two layer in "Microshock" material perforated to grant best air flow

- Ergonomic characteristics favour the rider's free movements
- Sensitive® and Airnet material: light and breathable
- Side protection protects from abrasions
- Removable back protection

Color: B

Color: A

PADDED SHORTS FOR KIDS | PI04158

SIZES: S - M - L - XL | Color: KB - WB

100% MADE IN ITALY

Shorts con supporti laterali in plastica da bambino

- Grande ergonomia e massima libertà nei movimenti
- Realizzati in tessuto tecnico Airnet: leggero e traspirante
- Protezioni laterali rigide in polietilene all'altezza del femore per proteggere il pilota dalle forti abrasioni

Padded plastic shorts for kids

- Ergonomic characteristics favour the rider's free movements
- Made with Airnet material: light and breathable
- Polyethylene side protections inserted at femur height protects the racer from abrasions

POWERED BY
SIXS

SAS-TEC
body protection systems

La maglia intima CAMO con protezioni interne è stata realizzata in collaborazione con SIXS®, e inoltre, racchiude all'interno la tecnologia delle protezioni SAS TEC e Koroyd.

Il materiale della maglia è composto da polipropilene poliammide e carbonio. Il polipropilene ha la eccezionale capacità di rimanere sempre asciutto essendo idrofobico. Grazie alla struttura ad imbuto della brevettata trama SIXS la maglia attira l'umidità della cute assorbendola e trasferendola all'esterno, lasciando il corpo asciutto e naturalmente termoregolato. Il vero filamento di carbonio che si intreccia al polipropilene amplifica la capacità di regolare la temperatura corporea, e dona proprietà antistatiche. In estate la trama sixs permette di trasferire il calore all'esterno tramite il sudore e l'umidità, lasciando asciutti e freschi. In inverno le stesse caratteristiche permettono di non raffreddarsi a causa del sudore sulla pelle ma di rimanere asciutti e caldi.

- Protezioni interne con tecnologia SAS TEC/Koroyd su gomiti e spalle
- Protezione schiena interna con tecnologia SAS TEC/Koroyd
- Protezione frontale STF (SAS TEC Foam)
- Protezioni removibili per il lavaggio
- Termoregolazione costante
- Massima traspirabilità
- Leggera come una piuma
- Batteriostatica
- Asciugatura rapida

CAMO undershirt with Internal protections is made by collaboration with SIXS® and includes internal protections with patented technology of SAS TEC and Koroyd Cores.

The configuration of Original Carbon Underwear® allows sweat to be truly taken away from the skin to the outside due to low density zones properly alternating with light pressure zones. This peculiarity ensures the athlete correct thermoregulation and optimum breathability under all conditions.

The low density zones are created by using carbon fiber that not only is extremely hard-wearing and ultralight, but also boasts an enormous thermal insulation capacity. Its fineness in the form of textile fiber, which makes it practically invisible to the human eye, creates those micro cavities that channel sweat to the outside so the skin is left dry. Dryarn®, polyamide fiber and polyurethane fiber, complete the blend and add essential characteristics such as: thermoregulation, water-repellency, bending and wear resistance, stretch and non-deformability.

Thanks to its blend of textile fibers, the Carbon Underwear® fabric is just like a breathable barrier that keeps the body temperature constant under all weather conditions. The patented SIXS weave stitch and the polypropylene found in our fabric create a perfect combination: a lower liquid absorption rate and a greater water vapour permeability than other textile fibers. The Carbon Underwear® fabric has the lowest specific weight of all textile fibers on the market. The Carbon Underwear® fabric respects the skin and protects it from bacteria and pollutant dusts. Eliminating the risk of annoying allergies and unpleasant smells. The Carbon Underwear® fabric dries almost instantly, due to its capacity to not absorb liquids and moisture.

- SAS TEC/Koroyd Internal protections on elbows and shoulders
- SAS TEC/Koroyd Internal back protection
- Front protection STF (SAS TEC Foam)
- Protections removable for washing
- Constant thermoregulation
- Maximum breathability
- Light as a feather
- Bacteriostatic
- Fast drying

KOROYD CORES

SAS-TEC

Protezioni interne con tecnologia SAS TEC/Koroyd. Removibili per il lavaggio
Internal protections with SAS TEC/Koroyd technology. Removable for washing

Le semisfere a rilievo presenti nella parte interna del back protector (la parte a contatto con la schiena), consentono un importante incremento del flusso d'aria e una efficace dissipazione del calore.
The relief semisphere in the back side of the back protector allows an important increase in airflow and effective heat dissipation.

Pettorina ENIGMA con protezioni interne SAS TEC/KOROYD
Con la nuova serie di protezioni Sas Tec/Koroyd, UFO Plast combina le caratteristiche positive della tecnologia SAS-TEC e Koroyd Cores generando qualcosa di completamente innovativo: una protezione leggera, traspirante e con la più alta capacità di smorzamento dell'energia da impatto.

ENIGMA Bodyguard with SAS TEC/KOROYD protections
With their new SK-protection-series UFO combines the positive features of SAS-TEC foam and Koroyd Cores to something completely new: lightweight, breathable and highest damping capacity.

SAS-TEC SAS-TEC - Sicurezza fatta di schiuma

A differenza della schiuma PU convenzionale, la schiuma viscoelastica poliuretanic di SAS-TEC è in parte fatta di materiali rinnovabili. Le sue caratteristiche speciali includono risposta spontanea, massimo comfort e prestazioni di smorzamento unico, con un eccellente assorbimento di energia quasi lineare. La speciale micro struttura della schiuma SAS-TEC è responsabile di un comportamento adattivo di smorzamento dell'energia da impatto: maggiore è la velocità di impatto, maggiore è la resistenza della schiuma. Tutte queste caratteristiche garantiscono la miglior protezione possibile per il corpo.

SAS-TEC - safety made of foam

In contrast to conventional PU foams the viscoelastic PU foam of SAS-TEC is partly made of renewable materials. Its special features include spontaneous response, highest comfort and unique damping performance with excellent nearly linear energy absorption. A very special micro structure of the SAS-TEC foam is responsible for an adaptive damping behavior – the higher the speed of the impact, the higher the resistance of the foam. All these features guarantee the best possible protection for your body.

Koroyd Cores - Prestazioni e traspirabilità

La combinazione del preciso processo di estrusione e l'unica saldatura termica di Koroyd creano una struttura dalle prestazioni estremamente elevate e costanti, con caratteristiche di assorbimento dell'energia da impatto e traspirabilità superiori. Su impatti ad alta velocità i nuclei si schiacciano in modo completamente controllato, decelerando l'energia dell'impatto e riducendo notevolmente i livelli di trauma finali. I canali di costruzione cellulare completamente aperti di Koroyd assicurano il flusso d'aria e la traspirazione, senza alcuna limitazione.

La tecnologia brevettata Koroyd è integrata nei migliori dispositivi di protezione per attività sportive.

Koroyd Cores - Performance and Breathability

The combination of Koroyd's precise extrusion and unique thermal welding process leads to a structure with both extremely efficient and consistent energy absorption properties. Upon high velocity impacts the cores crush in a completely controlled manner, decelerating the energy from the impact and greatly reducing the final trauma levels. Koroyd's completely open cell construction channels airflow around the rider, without limitation.

Koroyd patented technology is integrated into the best sports and protection products that give you the edge.

Protezione schiena, protezione spalla e protezione gomito con tecnologia SAS TEC / KOROYD
Back protector, Elbow and Shoulder guards with SAS TEC / KOROYD Technology

Pettorina ULTRALIGHT con protezioni in STF (SAS TEC Foam), realizzata completamente in materiali aerati
• Realizzata con rete in poliestere e Airmet
• Protezioni interne in STF (Sas Tec Foam) removibile per il lavaggio
• Massima leggerezza
• Grande traspirabilità
• Elevata elasticità per assorbimento urti

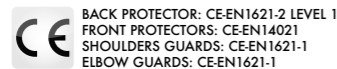

ULTRALIGHT Bodyguard with STF (SAS TEC Foam) protections, totally made from airmet material
• Made with polyester net and Airmet material
• Internal protection in STF (Sas Tec Foam) removable for washing
• Maximum lightness
• Maximum transpiration
• Increased elasticity to absorb shock

PROERGO BODYGUARD | PE02276

Sizes: S/M - L/XL - XXL | Color: W

100% MADE IN ITALY

Pettorina PROERGO con sistema di contenimento articolare, cintura in vita regolabile e maniche removibili
PROERGO Bodyguard with articular restraint system, adjustable body belt and removable sleeves

- Massima integrabilità con Neck Brace
- Maniche removibili
- Tessuto anti smagliatura "Sensitive®" dal grande comfort bioclimatico
- MATERIALE ANTI-SHOCK INTERNO:
Polietilene forato (100% PE) Il foro di diametro 4mm e con un passo di 7.5 mm garantisce una traspirazione ottimale.
ELLERES P forato (100% PU ViscoElastico): prodotto termosensibile che si modella continuamente alle forme del corpo. Grande capacità di assorbimento e distribuzione degli urti.
- MATERIALE ANTI-SHOCK ESTERNO:
in PE con struttura ad "Alveoli Esagonali" offre un' efficace assorbimento dell'urto e una corretta dissipazione del calore corporeo.
- CONTENIMENTO ARTICOLARE:
"Pro Ergo" possiede due tiranti tensionabili che partono dalle spalline e giungono sulla fascia lombare dove vengono assicurati grazie ad un fissaggio in velcro. I tiranti seguono un andamento ad "X" e consentono di contenere l'ipertensione dell'articolazione della spalla, pur consentendo tutti i movimenti necessari alla normale attività motociclistica (On & Off road).

- Maximum integrability with the Neck Brace
- Removable sleeves
- Great bioclimatic comfort thanks to the exclusive "Sensitive®" fabric
- ANTI-SHOCK MATERIAL INSIDE:
Reticulated Polyethylene (100% PE): The 4mm diameter hole with 7.5 mm distance guarantees great transpiration.
ELLERES P forato (100% PU ViscoElastico): is a heat-sensitive product which continuously conforming to the shape of the body. Great ability to absorb and distribute shock.
- ANTI-SHOCK MATERIAL OUTSIDE
Made from polyethylene plastic PE with high impact resistance, the external anti-shock material has a "Honeycomb" structure, and it offers extremely effective shock absorption and the right heat dissipation (so as to avoid internal overheating).
- ARTICULAR RESTRAINT
"Pro Ergo" has two straps which can be tightened. They start at the shoulders and reach the waist where they are fastened with Velcro. The straps cross over in an "X" so that the articulation of the shoulder remains taut at the same time permitting all movements that a motor cyclist has to make (on and off the road).

Ufo Plast Morpho Fit, è un prodotto interamente made in Italy che rappresenta una nuova ed innovativa risposta concettuale nel panorama dei tutori articolati per la protezione del ginocchio in ambito sportivo. Un risultato frutto di una attenta e costruttiva collaborazione tra la **Alberto Barozzi Concept**, la **Tek Neg** (ingegnerizzazione) e lo staff tecnico della **UFO PLAST**, che ha permesso di sviluppare un prodotto che racchiude in sé una serie di fattori tecnico-funzionali, quali:

- Struttura ergonomica con caratteristiche strutturali ad alta prestazione in speciale polimero plastico
- Assoluto contenimento dell'articolazione del ginocchio grazie a:
 - a - supporto legamenti collaterali mediale e laterale
 - b - supporto legamenti crociati anteriore e posteriore
 - c - protezione rotula
- Corretto adeguamento taglie tramite le regolazioni disponibili;

Ufo Plast Morpho Fit, a product made entirely in Italy representing a new and innovative conceptual response in the range of jointed braces for knee protection in sport. The result of careful, constructive cooperation between **Alberto Barozzi Concept**, **Tek Neg** (engineering) and the **UFO PLAST** technical staff, which made it possible to develop a product that embraces a number of technical and functional factors, including:

- Ergonomic structure with high-performance structure characteristics made from a special plastic polymer
- Total containment of the knee joint thanks to:
 - a - medial and lateral collateral ligament support
 - b - anterior and posterior cruciate ligament support
 - c - patella protection
- Proper size adjustment thanks to adjustments available

- **CPSO** (Condyle Pad Spheric Orientation): Tamponi condilici orientabili su supporto sferico per un ottimale contenimento dell'articolazione
- **TOP** (Tibia Orientation Position): Supporto tibiale in due versioni e regolabile, in riferimento alla soggettiva struttura morfologica della tibia, per un corretto adattamento e comfort
- **ACLSS** (Anterior Cruciate Ligament Support System): Sistema di contenimento regolabile per l'LCA (legamento crociato anteriore)
- Contenimento legamenti collaterali mediale e laterale
- Snodo a quadrilatero strutturale in acciaio inox sigillato, per un corretto rapporto di traslazione e rotazione dell'articolazione e la miglior integrazione nel movimento di flessione estensione del ginocchio
- Patella cup strutturale per un efficace dissipazione dell'urto limitando così l'impatto diretto sulla rotula
- Struttura telescopica superiore per proteggere retto del femore - vasto mediale e sartorio
- Sistema di fissaggio alla gamba a 4 punti regolabili
- **HLS** (Hyperextension limit system): Fermi per limitare l'iperestensione con varianti: 0° - 15° - 25° - 35°
- Attacchi orientabili per il miglior adattamento alla gamba degli straps
- Straps termosaldati in materiale anallergico e antibatterico di ridotto spessore per il miglior contenimento e comfort
- Termoformato **BAL** (bioclimatic action low): struttura in poliuretano espanso anallergico e antibatterico con texture pluriball per garantire la migliore aderenza alla gamba e un ridotto rapporto bioclimatico, elevato potere di assorbimento degli urti. Facilmente smontabile per una pratica pulizia
- **MFBS** (Morpho Fit Boots System): Supporto ad interferenza con la parte superiore dello stivale per sostenere il tutore
- **ADHM** (assembly/disassembly home made): Sistema di assistenza gestita in autonomia grazie al sistema concettuale ingegneristico espresso nella realizzazione del prodotto
- Tubolare ergonomico per consentire la migliore applicazione del tutore
- Tutti i materiali sono resistenti all'acqua e anti-corrosivi
- Ridotto peso (taglia S/M = 760 gr - taglia L/XL = 820 gr)

- **CPSO** (Condyle Pad Spheric Orientation): Adjustable condyle pads, made of a spherical support for perfect containment of the joint
- Tibial support in two versions can be adjusted, with reference to the subjective morphologic structure of the tibia, for correct adaptation and comfort. **TOP** (Tibia Orientation Position)
- Adjustable containment system for the ACL (anterior cruciate ligament). **ACLSS** (Anterior Cruciate Ligament Support System)
- Medial and lateral collateral ligament containment
- Sealed stainless steel structural four-sided joint, for a correct relationship between translation and rotation of the joint and the best integration in the knee flexion-extension movement
- Structural patella cup for effective impact dissipation, thereby limiting the direct impact on the patella
- Telescopic upper structure to protect the rectus femoris - vastus medialis and sartorius muscle
- Adjustable 4-point leg-fastening system for correct positioning
- **HLS** (Hyperextension Limit System): Stoppers to limit hyperextension with variations: 0° - 15° - 25° - 35°
- Adjustable fittings for the best adaptation of the straps to the leg
- Heat-welded, hypoallergenic, antibacterial straps with reduced thickness for better containment and comfort
- Thermoformed **BAL** (bioclimatic action low): structure made from hypoallergenic, antibacterial polyurethane foam with bubble wrap texture to ensure the best adherence to the leg and a reduced bioclimatic ratio and high shock absorption power. Easily removable for easy cleaning
- **MFBS** (Morpho Fit Boots System): Interference support with the top of the boot to support the brace
- **ADHM** (assembly/disassembly home made): Assistance system managed independently thanks to a conceptual engineering system expressed in the creation of the product
- Ergonomic "tube-sock" to enable better application of the brace
- All materials are water resistant and anti-corrosive
- Lightweight (size S/M = 760 gr - size L/XL = 820 gr)

REPLACEMENTS MORPHO FIT KNEE BRACE

MADE IN ITALY **SAS-TEC** body protection systems **CE** KNEE PROTECTOR: CE-EN1621-1

Ginocchiera JACKAL con protezioni interne in STF (SAS TEC FOAM). La Ginocchiera Jackal è completamente aperta per poter essere indossata comodamente anche senza togliersi le scarpe, con elastici regolabili per un perfetto fissaggio al ginocchio. La ginocchiera Jackal è più lunga della ginocchiera Spartan EVO, ed arriva a coprire parte dello stinco del rider.

- Protezioni interne in STF (SAS TEC FOAM)
- Tessuto in microfibra anti-scratch
- Leggerissima e altamente protettiva
- Grande traspirabilità e massima ergonomia
- Imbottiture laterali

JACKAL Knee-Shin Guards with internal STF protections (SAS TEC FOAM).

The Jackal Knee/shin guards for DH - ENDURO, the knee guard is completely open in order to be worn comfortably even without taking off your shoes, with adjustable elastic straps for a perfect fixation to the knee. The Jackal Knee/shin guard is longer than the knee guard Spartan EVO, and cover part of the shin of the rider also.

- Internal protections in STF (SAS TECH FOAM)
- Anti-scratch micro-fibre
- Very light weight and extremely protective
- Maximum transpiration and maximum ergonomics
- Lateral padding

Protezioni interne in STF (Sas Tec Foam) removibili per il lavaggio
Internal protection in STF (Sas Tec Foam) removable for washing

- Integration with helmets and body protector
- Great fitting
- Light weight
- Available in 2 new graphics
- Two sizes of thickness of the foam for a better fitting
- Removable cover for washing
- Back supports adjustable in two different positions

L'NSS è stato sviluppato con un concetto di elevata ergonomia per meglio assolvere alle necessità di interazione tra busto, dorso e spalle sia con protezioni che senza.

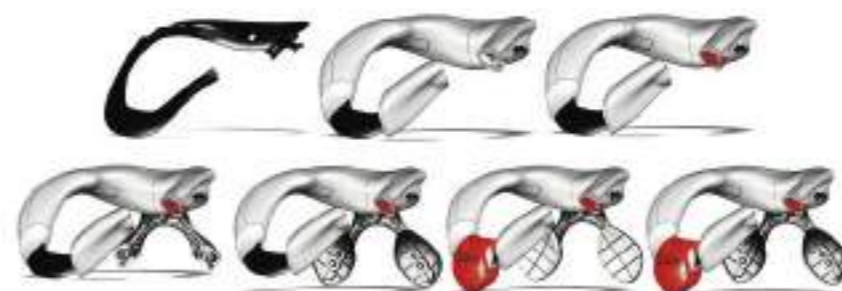

NSS neck support has been developed for a better interaction among body, back and shoulders with protections and without protections.

Color: B

Color: DFLU
NEON COLOR

I tecnici della Ufo plast hanno sfruttato la loro grande conoscenza dei polimeri plastici per produrre l'NSS, creando un co-stampato tra polimeri iniettati e polimeri espansi che rappresenta una vera novità nel settore, evitando l'utilizzo di pericolose (in caso di cedimento strutturale) fibre composite.

Un processo che conferisce caratteristiche strutturali adeguate per la necessità e al tempo stesso assicura un confort ottimale, lo sviluppo ergonomico del prodotto e le proprietà del PU espanso assicurano un ottimo assorbimento agli urti e un'ininfluente interferenza con il collo in caso di contatto.

Ufo plast technicians used their great knowledge of the plastic polymers to produce the NSS (co-moulded injected polymers), avoiding the use of dangerous (in case of structural failure) composite fibers.

L'attacco laterale permette di indossare l'NSS con estrema facilità e in totale autonomia, anche con il casco indossato. Un'efficace sistema di sicurezza consente il mantenimento della chiusura in caso di urto.

The side attack allows to wear the NSS with extreme facility and in total autonomy, also after putting the helmet in your head. A safety system allows the maintenance of the closure also case of crash.

A collage of vintage motorcycle racing images. The background is a sepia-toned photo of a dirt track race with many riders. Overlaid on this are several other images: a rider on a yellow bike in the top left, a rider on a dark bike in the center, a rider on a white bike with number 23 in the bottom left, and a rider on a Honda bike with number 85 in the bottom right. The overall aesthetic is nostalgic and high-contrast.

Alien Ice Care è una giovane azienda che progetta e sviluppa dispositivi innovativi per crioterapia che vengono utilizzati nell'ambito post traumatico e post chirurgico. I sistemi consistono in un supporto regolabile in tessuto ipoallergenico traspirante, all'interno del quale vengono inseriti elementi refrigeranti precedentemente portati a solidificazione.

Cosa succede ai tessuti dopo un infortunio?

Quando si stira un muscolo o si strappa un tendine si lesionano i tessuti molli, provocando dolore nella zona interessata. Contestualmente si rompono anche i piccoli vasi sanguigni, i capillari, che quindi disperdono siero e sangue nei tessuti adiacenti provocando gonfiore localizzato.

Il dolore al distretto lesionato, dovuto al trauma e al gonfiore, provoca ipomobilità alla zona colpita (articolazione o zona muscolare) con possibile infiammazione dei tendini.

L'utilizzo dei dispositivi medici Alien Ice Care, grazie all'abbassamento localizzato della temperatura, favorisce la costrizione dei vasi sanguigni, che riduce l'ulteriore fuoriuscita di sangue e siero, limitando così la formazione del gonfiore.

La fuoriuscita di liquidi, inoltre, allunga i tempi di recupero e il ritorno alla vita quotidiana, e, nel caso di uno sportivo, i tempi necessari per tornare in campo.

I sistemi Alien Ice Care vengono utilizzati anche dopo un allenamento o una seduta di riabilitazione per ridurre al minimo la perdita di liquido infiammatorio e/o sangue dai capillari che si rompono durante gli esercizi. Tale applicazione svolge inoltre un importante effetto antalgico.

PLUS:

- Geometria e struttura: la geometria, le dimensioni e il posizionamento degli elementi refrigeranti permettono l'abbassamento localizzato della temperatura, focalizzandosi sulle aree anatomiche maggiormente interessate dal trauma, evitando il raffreddamento diretto di zone limitrofe che potrebbero essere leggermente compromesse. Il design preformato permette un facile utilizzo, la ripetibilità dell'applicazione ed inoltre la possibilità di compiere altre attività durante il trattamento.

- Mantenimento della temperatura: in base alle problematiche da trattare è possibile utilizzare temperature diverse: 6.5° C e 15° C, anche durante la medesima applicazione. Il mantenimento della temperatura, costante per più di un'ora, è dimostrato da indagini con termo camera.

- Materiali utilizzati: ipoallergenici, traspiranti ed elastici assicurano un perfetto adattamento del supporto e il mantenimento della posizione permettendo all'utente di svolgere una regolare attività fisica anche durante l'applicazione del dispositivo. Grazie alla natura dei tessuti e degli elementi refrigeranti il dispositivo non provoca in alcun modo ustioni da freddo.

- Preparazione facile e veloce, grazie alla rapida solidificazione degli elementi refrigeranti e alle pratiche tasche che li accolgono.

Tutti i dispositivi Alien Ice Care sono garantiti 3 anni.

Alien Ice Care is a young company that develops and creates innovative devices for cryotherapy, used in post-traumatic and post-surgery. The systems consist of an adjustable support in breathable hypoallergenic fabric, inside which are inserted cooling elements previously solidified.

What happens to the tissues after an injury?

When you stretch a muscle or tear a tendon, an injury to the soft tissue is induced, causing pain in the affected area. Simultaneously it also breaks down also the small blood vessels. The capillaries then disperse blood and serum in the adjacent tissues causing localized swelling.

The pain in the injured area, due to the trauma and swelling, causes hypomotility to the affected area (joint or muscle area) with possible inflammation of the tendons.

The use of medical devices Alien Ice Care, thanks to the localized lowering of temperature,

favour the blood vessels constriction, which reduces further leakage of blood and serum, thus limiting the formation of swelling.

The leakage of liquids also protracts the recovery time and return to everyday life, and in the case of an athlete the time required to return to play.

Alien Ice Care systems are also used after a workout or a rehabilitation session to minimize the loss of inflammatory fluid and/or blood from the capillaries that break during exercise. This application also conducts an important analgesic effect.

PLUS:

- Geometry and structure: the geometry, size and placement of the cooling elements allow the localized lowering of the temperature, focusing on the anatomical areas most affected by the trauma. It avoids the direct cooling of adjacent areas that may be slightly compromised. A pre-shaped design allows easy use and repeatable applications. Furthermore the end user can do regular activities during the treatment.

- Temperature maintenance: according to patient issues it is possible to use different temperatures: 6.5° C and 15° C, even during the same application. The maintenance of temperature, constant for more than one hour, is shown by investigations with thermo-camera.

- Materials used: hypoallergenic, breathable and elastic materials ensure a perfect fit of the support and maintenance of the position, allowing the end user to carry out regular physical activity even during the application of the device. Thanks to the nature of the fabrics and cooling elements the device does not cause frostbite.

- Quick and easy preparation: thanks to the rapid solidification of the cooling elements and practical pockets that receive them.

All Alien Ice Care devices are guaranteed for 3 years.

TWINWALL

RENTHAL
THE #1 HANDLEBAR IN RACING

TWINWALL HANDLEBAR

Il rivoluzionario manubrio Twinwall ha un diametro maggiorato [1 1/8"] e un doppio tubo per una maggiore resistenza. I manubri Twinwall sono i più sicuri e resistenti manubri al mondo. Il rivoluzionario manubrio Twinwall utilizza due tubi, rendendo virtualmente impossibile danneggiamenti. Il manubrio Twinwall offre il 50% di flessibilità in più rispetto ad un tradizionale manubrio 7/8 in acciaio. I manubri Renthal Twinwall sono utilizzati dal Team Honda USA, Team Kawasaki USA, Red Bull KTM USA, Factory Connection Honda, Pro Circuit Kawasaki, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki European e Factory KTM Team.

Renthal Twinwalls are the safest and strongest handlebars in the world. Renthal's revolutionary Twinwall handlebar utilizes two tubes, making fatigue failure virtually impossible. The immensely strong Twinwall offers 50% more flex than a traditional steel 7/8 bar. Renthal Twinwalls are currently used by Team Honda USA, Team Kawasaki USA, Red Bull KTM USA, Factory Connection Honda, Pro Circuit Kawasaki, Yamaha of Troy, Team Honda Martin Racing, Team Kawasaki Europe, Team Suzuki Europe and Factory KTM Europe.

7/8 HANDLEBAR

La migliore qualità dei materiali, lo studio e l'arte hanno permesso ai manubri Renthal 7/8 [22,2 mm] di vincere più campionati di qualsiasi altro manubrio nel mondo. Una esclusiva lega di alluminio rende i manubri Renthal il 20% più resistenti di qualsiasi altro manubrio al mondo. Il manubrio Renthal 7/8 è scelto come primo equipaggiamento da Honda e Kawasaki.

The highest quality material, engineering and craftsmanship have allowed Renthal 7/8 bars to win more championships than any other bar in the world. An exclusive aluminium alloy helps make Renthal Handlebars 20% stronger than any other bar in the world. Renthal 7/8 Handlebars are chosen as original equipment by Honda and Kawasaki.

FATBAR HANDLEBAR

I manubri Fatbar offrono una eccellente resistenza ed una buona elasticità. Lo spessore di 5 mm nelle curvature incrementa la resistenza. I manubri Fatbar sono stati scelti come primo equipaggiamento da KTM e Suzuki e sono utilizzati da HRC Honda Japan, Team Suzuki Japan, Kawasaki Japan, Factory Honda Off-Road USA, Kawasaki Team Green USA, Team Red Bull KTM Off-Road, Team Suzuki Off-Road e Contesa Honda.

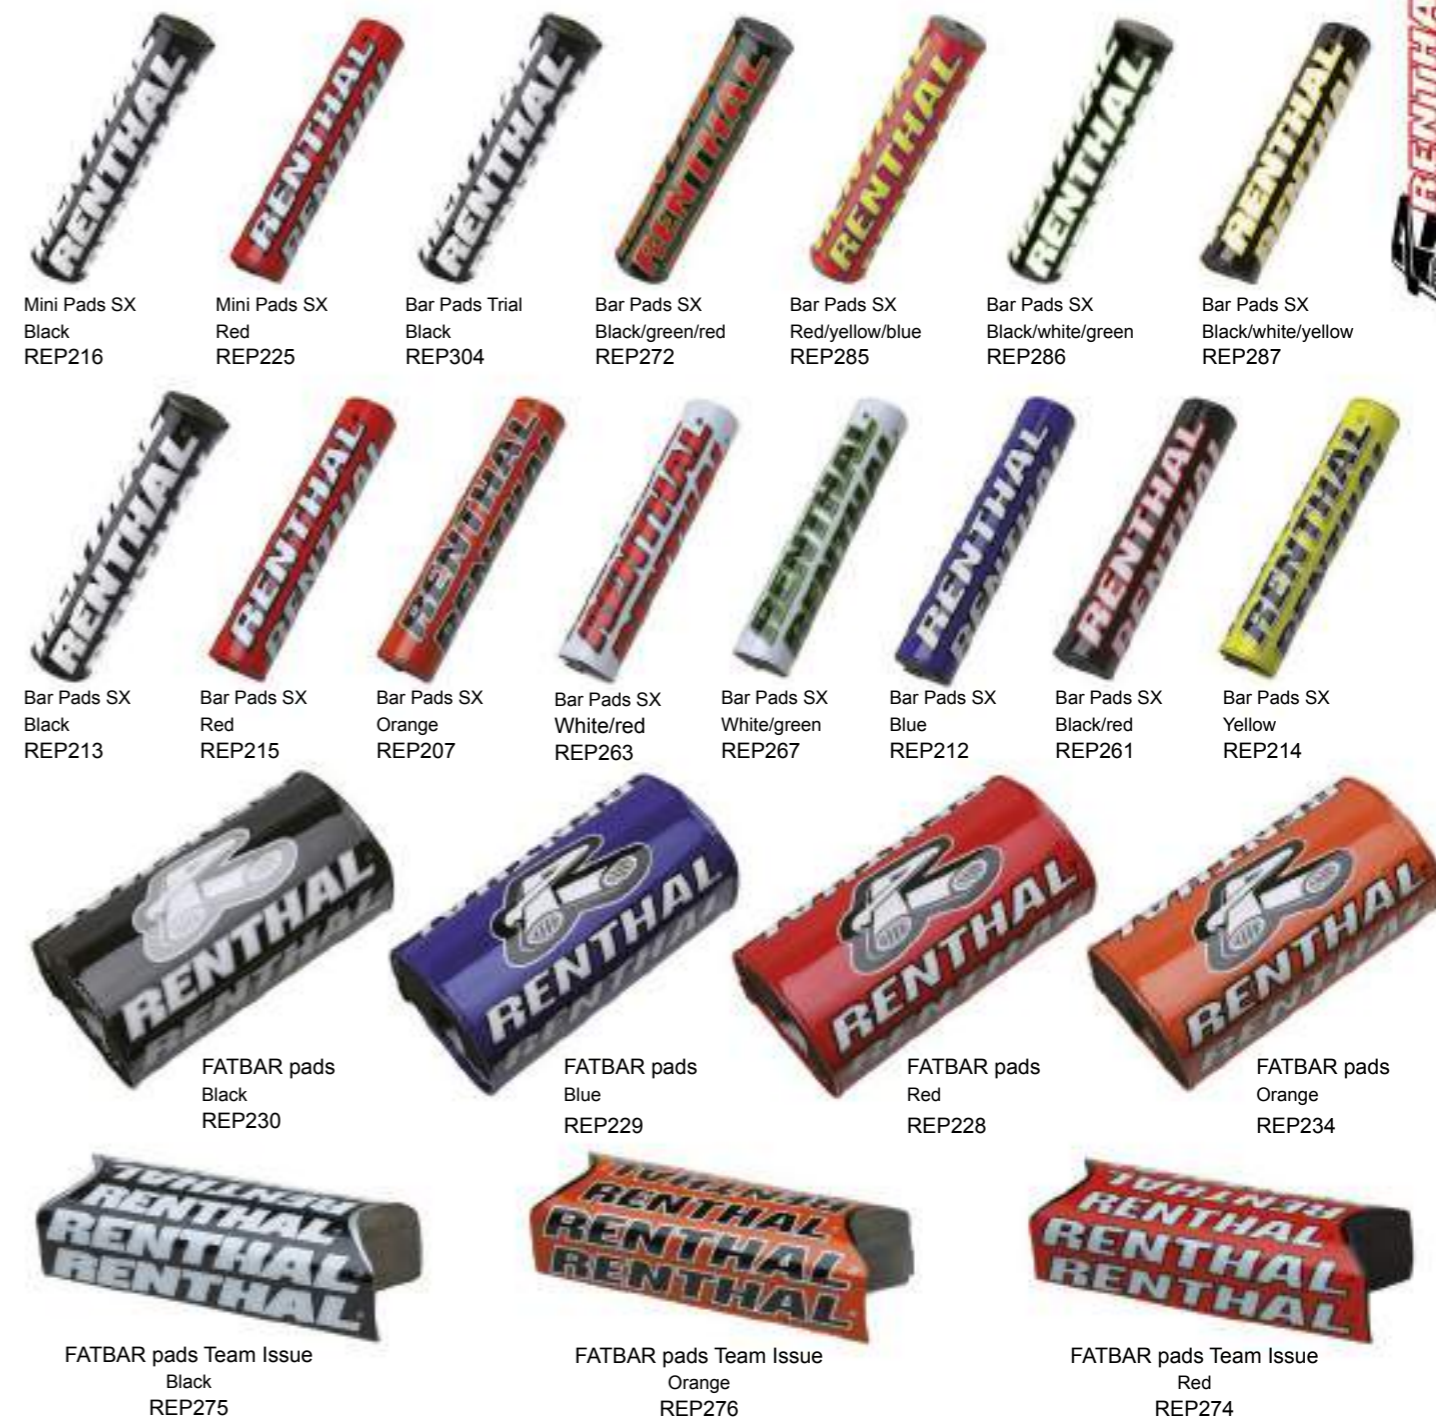

Renthal Fatbars are a tapered, braceless bar design, combining excellent strength and good resilience. The tapered outer wall allows 11/8 inch clamping diameter and 7/8 inch at control ends. A 5.0mm wall thickness at the bends is used to increase strength. They have a shot peened and anodised corrosion resistance finish and feature a laser etched positioning grid. Renthal fatbars have been chosen as original equipment by KTM and Suzuki and are used by HRC Honda Japan, Team Suzuki Japan, KHI Kawasaki Japan, Factory Honda Off-road USA, Kawasaki Team Green USA, Team Red Bull KTM Off-road, Team Suzuki Off-road and Montesa Honda.

ULTRA TACKY GRIP TECH

RENTHAL

REG197 - DUAL SERIES

REG198 - TAPERED SERIES

RENTHAL® ULTRA-TACKY™ GRIPS

Le manopole Renthal® Ultra-Tacky™ sono state sviluppate per aumentare la trazione tra il guanto e la manopola, aumentando il controllo e riducendo l'affaticamento del pilota.

L'esclusivo composto Ultra-Tacky™ produce costantemente e rinnova un rivestimento superficiale adesivo che, combinato con il morbido composto Renthal® offre una superficie incredibilmente aderente e confortevole. Adatto per l'utilizzo in tutte le condizioni, la manopola è particolarmente applicabile dove i piloti sono alla ricerca di un maggior controllo del manubrio. La superficie adesiva durerà per tutta la vita della manopola e se perde la sua viscosità in qualsiasi punto, è sufficiente lavare le manopole con acqua pulita e lasciarle asciugare all'aria per riattivarne la viscosità.

- Renthal® Dual Compound
- Ultra-Tacky™ composto esterno offre maggiore trazione (durezza simile a Renthal Soft)
- La solida miscela interna incrementa la durata della manopola.
- Superficie adesiva durerà per tutta la durata della manopola e può essere riattivata in qualsiasi momento con acqua.

Renthal® Ultra-Tacky™ grips have been developed to increase traction between the glove and grip, increasing control and reducing rider fatigue. The unique Ultra-Tacky™ compound constantly produces and renews a sticky surface coating which when combined with the Renthal® Soft compound offers an incredibly grippy yet comfortable surface. Suitable for use in all conditions, the grip is particularly applicable where riders are looking for increased control of the handlebars. The sticky surface will last for the lifetime of the grip and if it loses its stickiness at any point, simply wash with clean water and allow the grips to air dry to re-activate.

- Renthal® Dual Compound Construction
- Ultra-Tacky™ outer compound provides increased traction (similar in hardness to Renthal Soft)
- Firm inner compound provides durability at grip ends.
- Sticky surface will last for the lifetime of the grip and can be refreshed at any point with water.

DUAL COMPOUND KEVLAR GRIPS REG165

RENTHAL

KEVLAR GRIPS

Renthal ha sviluppato una particolare manopola rinforzata in kevlar, con tutte le caratteristiche tipiche delle manopole Renthal e in aggiunta le proprietà del Kevlar. Questo rivoluzionario materiale dura tre volte di più di un materiale tradizionale. Renthal has developed a special KEVLAR reinforced grip, with all the properties you would expect from a Renthal grip with the added LIFE EXTENDING properties of KEVLAR. This revolutionary material lasts three times as long as our regular soft material

FRONT CHAINWHEELS GROOVED

I pignoni Renthal "grooved" sono progettati per offrire una lunga durata e il massimo trasferimento della potenza. Sono lavorati CNC da acciaio temprato nichel-cromo 655M13. Le scanalature di fango sono lavorate CNC in ciascun dente su entrambi i lati per consentire al fango di scorrere dai punti di contatto chiave tra la catena e la catena. Questo aiuta a ridurre l'usura e aumenta la durata della trasmissione.

Renthal grooved off-road front chainwheels are designed to offer a long lasting front chainwheel in a lightweight design which offers maximum power transfer. They are CNC machined from a case hardened and core refined 655M13 nickel chromium steel. Mud grooves are CNC machined into each tooth on both sides to allow mud to flow away from the key contact points between the chain and the chainwheel. This helps reduce wear and increases the drivetrain lifespan.

FRONT CHAINWHEELS STANDARD

I pignoni Renthal standard sono di lunga durata, realizzati in acciaio speciale nichel-cromo-molibdeno sviluppato appositamente per offrire la massima combinazione di forza e durezza.

Standard front chainwheels are long lasting, hard wearing entry level front chainwheel. Constructed out a specially developed Nickel-Chrome-Molybdenum steel which is case hardened and core refined to give the ultimate combination of strength and hardness.

TWINRING

TwinRing è la più resistente corona per fuoristrada. Il design unico mantiene il peso al minimo e il TwinRing è compatto come una corona standard. L'anello interno è ad elevata resistenza, ultraleggero in alluminio 7075 T6. L'anello esterno è in acciaio Nickel Coated. L'esterno è espanso a 200° C e poi viene montato l'interno, creando un legame permanente per la tutta la vita della corona.

The longest lasting most durable off-road sprocket you can buy developed over 5 years. The unique flat face design keeps weight to a minimum and means the TwinRing's as narrow as a regular chainwheel. Inner Ring is high strength Ultralight 7075 T6 Aluminium. Outer Ring is ElectrolessNickel Coated steel Outer is expanded at 200 °C and then fitted to inner, creating a permanent bond for the life of the sprocket

RED

ORANGE

REAR CHAINWHEELS

La Corona RENTHAL Ultralight costruita in lega di alluminio 7075 T6, il peso ridotto e la notevole durezza rendono questa corona la più usata dai piloti professionisti. I fori di alleggerimento e i denti con scarichi per il fango, contribuiscono a ridurre l'usura, salvaguardando anche il consumo della catena.

Renthal Ultralight™ rear chainwheels are manufactured to extremely tight tolerances from a special material developed to withstand the rigours of Supercross, Motocross and Enduro. The 7075 T6 aluminium alloy rear chainwheels are 66% lighter than steel, yet incredibly durable. Their advanced tooth profile, concentricity and accuracy of fit provide maximum power transfer and long-life. Renthal's combination of a very high strength base material and an exceptionally hardwearing surface result in significantly increased chainwheel life.
